

PRECAST SOUNDWALLS FOR MICHIGAN DEPARTMENT OF TRANSPORTATION

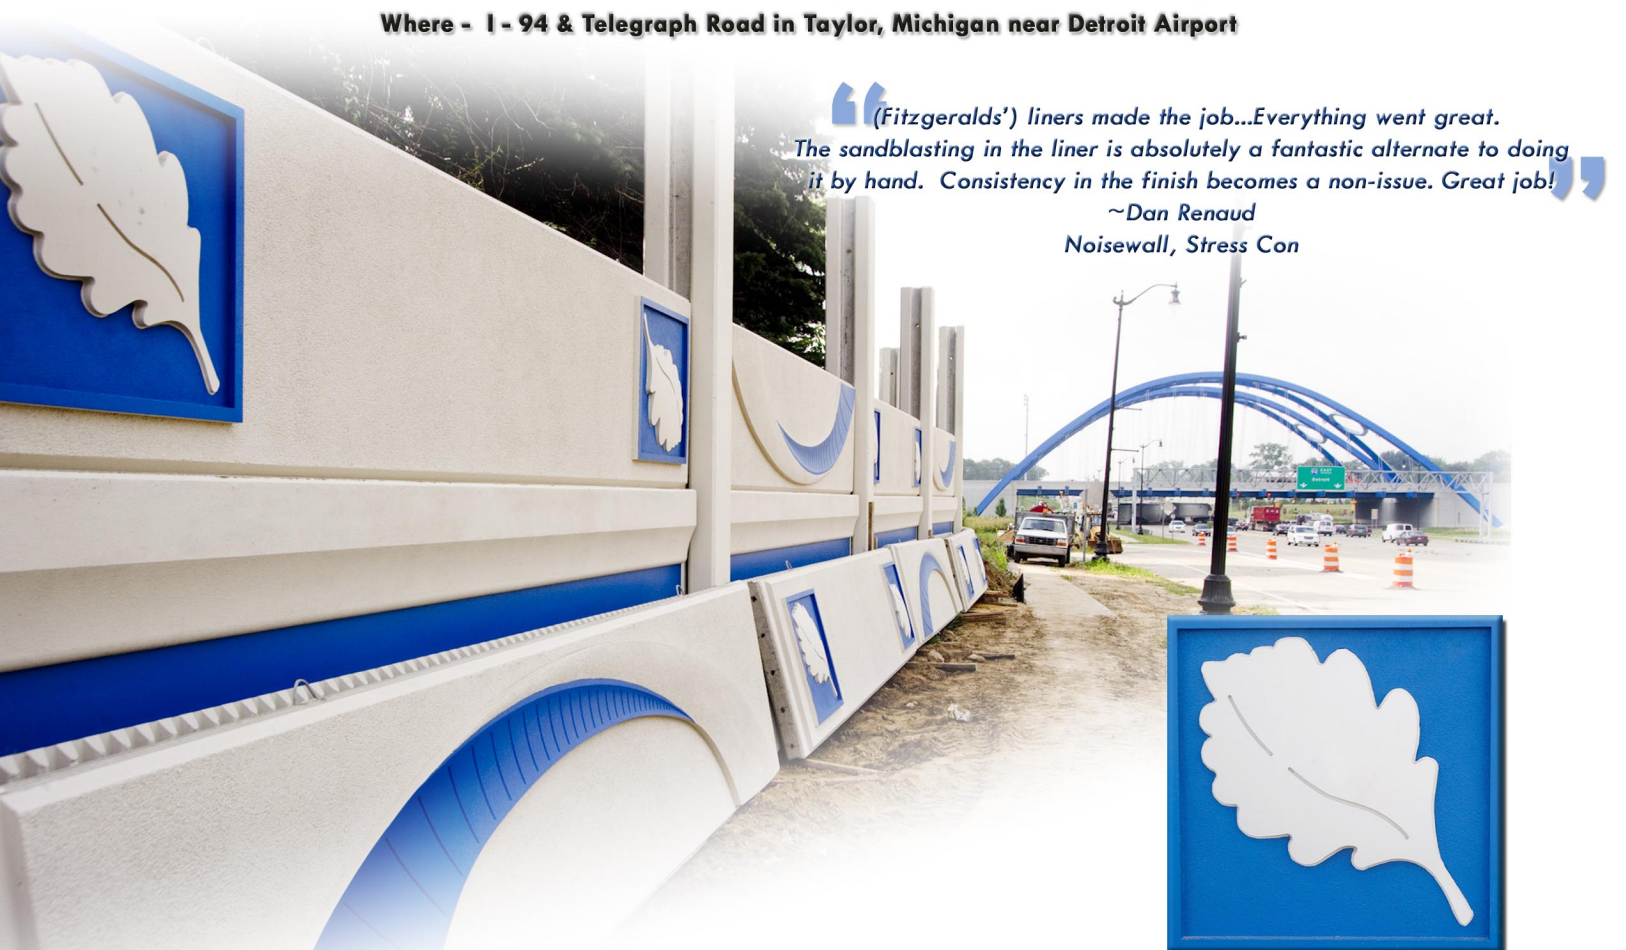

Imagine your creative design translated from paper into a full scale bridge, noisewall, or building that embodies your artistic concept. With 30 years of expertise in creating formliners, Fitzgerald Formliners will make that extra effort to provide you with great attention to detail and high quality engineering during the design phase, which will ensure that your aesthetic vision is reflected in the end result.

Project Facts:

Who - Precaster: Stress Con, Detroit, Michigan; Roadside Development Program, Michigan Department of Transportation > www.michigan.gov/mdot

What - Custom designed soundwalls with Fitzgerald Formliners' Patterns 16961 Cordova Fin, 16991 Light Sandblast, and 16992 Heavy Sandblast

Where - I - 94 & Telegraph Road in Taylor, Michigan near Detroit Airport

(Fitzgeralds') liners made the job...Everything went great. The sandblasting in the liner is absolutely a fantastic alternate to doing it by hand. Consistency in the finish becomes a non-issue. Great job!
~Dan Renaud
Noisewall, Stress Con
